acmnolwegge receipt of your 8/14 with what looks like Times clip to and including 8/14. Thanks. I can t take time to respond in detail to your letter but from reading it I'd say you are pêrsausaive that I was both too hasty and erroneous in those comments about which you do. I don t know if GL had an off switch at his desk. I'd be willing to presume that at the time of installation he anticipated no need like WG. I presume it could be at master control. It would certainly appear that if he could cut them off he didn't, otherwise he'd not have the sweat he has, not look as horrible, even for him, as he did night before last. He is in the greatest jeopardy if he tried to get anyone to edit those tapes. Unless done by the most profecient, detection doesn t take all that profeciency. There are only so many Ehrs and Haldes. and technicians are not generally so dedicated and motivated. ...On Dick, it is as you say. He should be o.k. ... Rejections: you've just joined the club again. But keep hoping. Have a great time, best HW 8/14/73
